Discovering John Lavranos: Our travels in Namibia and Madagascar

"If the last century of contributions to our knowledge of succulent plants could be compared to a large greenhouse, then John Lavranos would be one of the supporting poles near the centre. Not only has he found so many of Mother Nature's well-hidden and most beautiful succulent treasures, but he has shared the resulting knowledge and material with utmost generosity." Gerhard Marx in Vol 78-2 of 'Cactus and Succulent Journal' (March–April 2006)

This is a joint event with ASAS (Algarve Succulent Appreciation Society)

All Welcome – 5 euros on the door
